

On-Site Electric Vehicle Charging Policy

Governs employee use of the on-site charging station. Charging is a workplace convenience, not a guaranteed benefit, and a session may be limited, moved, or canceled.

Document owner	Office Manager	How to reserve	Outlook calendar event
Applies to	All on-site employees	Location / room	F1 - Charge Station
Standard session	3 hours, every other business day	Hours of use	Business hours only

1. Purpose

This policy sets how employees may use the on-site electric vehicle (EV) charging station. It keeps the station available during the workday, sets a fair scheduling limit, and reserves priority for founders and executives when they need the stall.

2. Scope

This policy applies to employees who park and charge a personal EV at the on-site charging station. Contractors, visitors, and vendors are not covered and may not use the station unless management grants a one-time exception in writing.

Use of the station is a privilege. It is not part of compensation, is not guaranteed, and may be changed or withdrawn at any time.

3. Eligibility and limits

3.1 Who may charge

- Active employees with a plug-in electric or plug-in hybrid vehicle.
- The vehicle must be the employee's own, or a vehicle the employee is authorized to use.
- The allowance applies to the employee, not to each vehicle the employee has access to.

3.2 Standard allowance

- **Session length.** An employee may reserve one charging session of up to three (3) hours on a charging day.
- **Frequency.** Charging days are every other business day, Monday through Friday. An employee who charges on Monday may next charge on Wednesday, not Tuesday. An employee who charges on Friday may next charge on Tuesday. Weekends or holidays do not count as charging days.
- **One session.** A session may not be split across days or extended past three hours. A second event on the same day is not a valid reservation.

- **Missed or canceled sessions.** A no-show or a session canceled by the company does not automatically use up the charging day. The Office Manager will look at the context and advise.

4. Hours of availability

The station is available 6AM to 6 PM. A session must start and end within the allotted time. The vehicle must be moved when the session ends so the stall is free for the next person.

Overnight charging and weekend charging are not allowed. Either requires written approval from management before the vehicle is connected. The request should explain why it is needed and when the vehicle will be connected and removed. Approval for one occasion does not create a standing exception.

5. How to reserve

Reserve the station the same way you reserve a conference room. Create an Outlook calendar event. Do not request a session by email.

The event needs only two things:

1. The employee's full name as the event title.
2. F1 - Charge Station selected as the location (the room resource).

Set the start and end time for three hours or less, inside business hours, on an eligible charging day. Leave the Teams meeting toggle off. Send the event so the room is booked. An employee may book a charging session no more than 2 days ahead of time, and a recurring calendar event is not allowed.

The stall is reserved when the event is on the calendar and F1 - Charge Station has accepted it. If the room shows as unavailable, that time is already taken. Do not book over an existing reservation. An event that does not include F1 - Charge Station does not hold the stall.

There is a 15-minute grace period after the start time. If the vehicle is not plugged in by then, the reservation may be released and another employee may take the stall. Cancel the event if you will not use it.

6. Priority for founders and executives

The priority list is founders and executives. They have priority use of the station, and that priority may require an employee's reservation to be moved, shortened, or canceled.

When a move is required, the Office Manager will email the affected employee and, when practical, call as soon as the conflict is known. The employee must disconnect and move the vehicle within 30 minutes of notice during business hours. Refusing to move the vehicle may result in loss of charging privileges.

A moved session does not automatically become an extra charging day, and it does not automatically use up the employee's charging day. The Office Manager may offer the next open slot that still follows the every-other-business-day rule. Priority use does not let an employee exceed the standard allowance.

7. Conduct at the station

- Stay only as long as you reserved. Unplug and move the vehicle at the end time even if the battery is not full.
- Charging is free to the employee. It is not free to the company. Book only the time you will use, and do not leave a finished vehicle in the stall.
- Do not daisy-chain adapters, leave cables in a drive aisle, or block adjacent stalls.
- Report damage, error lights, or a cable that will not release to the Office Manager before leaving the stall.
- Do not hold the stall with an unplugged vehicle, a non-EV, or a vehicle that has finished charging.
- Charging is at the employee's own risk. BOXABL is not responsible for battery wear, range, or damage arising from use of the station.

8. Enforcement

The Office Manager administers the calendar and is the first contact for schedule conflicts. Repeated no-shows after the 15-minute grace period, sessions beyond three hours, charging on a day that is not eligible, overnight or weekend use without approval, or refusal to move for a founder or executive may result in suspension of charging privileges. Workplace conduct rules still apply.

Management may close the station for maintenance, safety, power limits, or site operations. No charging time is owed for a closure.

9. Exceptions

Exceptions to the three-hour limit, the every-other-business-day cadence, or the business-hours rule would be handled on a case-by-case basis.

10. Questions

If a booking conflicts with someone else, or you are not sure whether a day is yours, ask the Office Manager. For an exception, talk to your manager first and loop in the Office Manager so the calendar stays accurate.
